## Dr Oliver Mathematics GCSE Mathematics 2009 June Paper 4H: Calculator 1 hour 45 minutes

The total number of marks available is 100. You must write down all the stages in your working.

 Tania went to Italy. She changed £325 into euros (€). The exchange rate was £1 = €1.68.
 (a) Change £325 into euros (€).
 When she came home she changed €117 into pounds. The new exchange rate was £1 = €1.50.
 (b) Change €117 into pounds.
 (c) Change €117 into pounds.

(b) Describe fully the single transformation that maps triangle **A** onto triangle **B**. (2)

- 3. The *n*th term of a number sequence is  $n^2 + 1$ . Write down the first three terms of the sequence.
- 4. The scatter graph shows information about eight sheep. It shows the height and the length of each sheep.

(2)

The table gives the height and the length of two more sheep.

Height (cm)	65	80
Length $(cm)$	100	110
Dr O	liv	er

(a) On the scatter graph, plot the information from the table.	(1)
(b) Describe the relationship between the height and the length of these sheep.	(1)
The height of a sheep is 76 cm.	
(c) Estimate the length of this sheep.	(2)
<ul> <li>5. Julie buys 19 identical calculators. The total cost is £143.64.</li> <li>Work out the total cost of 31 of these calculators.</li> </ul>	(3)
Mathematics 3	

- 6. F = 1.8C + 32.
  - (a) Work out the value of F when C = -8. (2)(2)

(3)

(2)

(2)

(4)

- (b) Work out the value of C when F = 68.
- 7. The diagram shows the position of two boats, P and Q.

Ν Ν QP

The bearing of a boat R from boat P is  $060^{\circ}$ . The bearing of boat R from boat Q is  $310^{\circ}$ . In the space above, draw an accurate diagram to show the position of boat R. Mark the position of boat R with a cross  $(\times)$ . Label it R.

- 8. There are some sweets in a bag.
  - 18 of the sweets are toffees.
  - 12 of the sweets are mints. (a) Write down the ratio of the number of toffees to the number of mints. Give your ratio in its simplest form.

There are some oranges and apples in a box. The total number of oranges and apples is 54. The ratio of the number of oranges to the number of apples is 1:5.

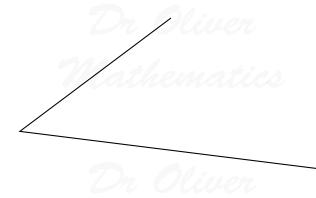

- (b) Work out the number of apples in the box.
- 9. The equation

$$x^3 + 20x = 71$$

$$4$$

has a solution between 2 and 3. Use a trial and improvement method to find this solution. Give your answer correct to one decimal place. You must show **all** your working.

10. Use ruler and compasses to **construct** the bisector of this angle. You must show all your construction lines.

11. Tarish says, 'The sum of two prime numbers is always an even number.' (2) He is wrong.
Explain why.

(2)

(4)

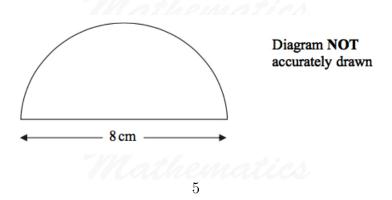

(3)

12. Sethina recorded the times, in minutes, taken to repair 80 car tyres. Information about these times is shown in the table.

Time ( $t$ minutes)	Frequency
$0 < t \leq 6$	15
$6 < t \leqslant 12$	25
$12 < t \leqslant 18$	20
$18 < t \leqslant 24$	12
$24 < t \leqslant 30$	8

Calculate an estimate for the mean time taken to repair each car tyre.

13. Here is a tile in the shape of a semicircle.

The diameter of the semicircle is 8 cm. Work out the perimeter of the tile. Give your answer correct to 2 decimal places.

14. (a) Simplify  $a \times a \times a$ .

4.6

- (b) Expand 5(3x-2). (1)
- (c) Expand 3y(y+4).
- (d) Expand and simplify 2(x-4) + 3(x+2). (2)
- (e) Expand and simplify (x + 4)(x 3).
- 15. Work out

$$\frac{4.6 + 3.85}{3.2^2 - 6.51}.$$

(1)

(2)

(2)

(2)

(1)

(1)

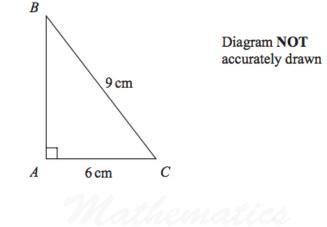

(2)

(2)

(3)

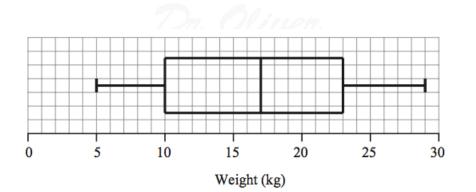

Write down all the numbers on your calculator display.

- 16. (a) Simplify  $t^6 \times t^2$ .
  - (b) Simplify  $\frac{m^8}{m^3}$ .
  - (c) Simplify  $(2x)^3$ .
  - (d) Simplify  $3a^2h \times 4a^5h^4$ .
- 17. ABC is a right-angled triangle.

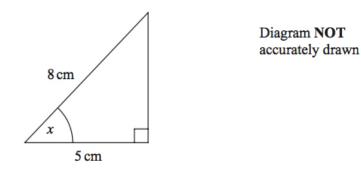

AC = 6 cm. BC = 9 cm. Work out the length of AB. Give your answer correct to 3 significant figures.

18. The box plot gives information about the distribution of the weights of bags on a plane.

	<ul> <li>(a) Jean says the heaviest bag weighs 23 kg.</li> <li>She is wrong.</li> <li>Explain why.</li> </ul>	(1)
	(b) Write down the median weight.	(1)
	(c) Work out the interquartile range of the weights.	(1)
	There are 240 bags on the plane.	
	(d) Work out the number of bags with a weight of 10 kg or less.	(2)
19.	Toby invested £4500 for 2 years in a savings account. He was paid $4\%$ per annum compound interest.	
	(a) How much did Toby have in his savings account after 2 years?	(3)
	Jaspir invested £2400 for $n$ years in a savings account. He was paid 7.5% per annum compound interest. At the end of the $n$ years he had £3445.51 in the savings account.	
	(b) Work out the value of $n$ .	(2)

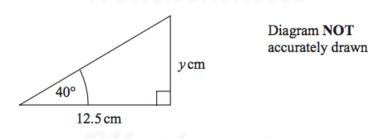

20. Here is a right-angled triangle.

(a) Calculate the size of the angle marked x. Give your answer correct to 1 decimal place. (3)

Dr Oliver

Here is another right-angled triangle.

- (b) Calculate the size of the angle marked y. Give your answer correct to 1 decimal place.
- 21. 258 students each study one of three languages. The table shows information about these students.

	German	French	Spanish
Male	45	52	26
Female	25	48	62

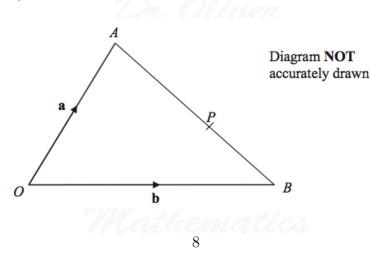

A sample, stratified by the language studied and by gender, of 50 of the 258 students is taken.

- (a) Work out the number of male students studying Spanish in the sample. (2)
- (b) Work out the number of female students in the sample.
- 22. Prove that

 $(3n+1)^2 - (3n-1)^2 \tag{3}$ 

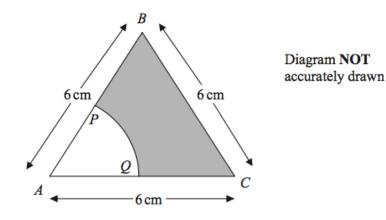

is a multiple of 4, for all positive integer values of n.

23. OAB is a triangle.

(2)

- $\overrightarrow{OA} = \mathbf{a}.$   $\overrightarrow{OB} = \mathbf{b}.$ (a) Find the vector  $\overrightarrow{AB}$  in terms of  $\mathbf{a}$  and  $\mathbf{b}$ .
  (1) P is the point on AB such that AP : PB = 3 : 2.
- (b) Show that  $\overrightarrow{OP} = \frac{1}{5}(2\mathbf{a} + 3\mathbf{b}).$
- 24. The diagram shows an equilateral triangle ABC with sides of length 6 cm.

P is the midpoint of AB. Q is the midpoint of AC. APQ is a sector of a circle, centre A. Calculate the area of the shaded region. Give your answer correct to 3 significant figures.

25. Simplify fully

- $\frac{x^2 8x + 15}{2x^2 7x 15}.$ (3)
- 26. Phil has 20 sweets in a bag.

5 of the sweets are orange.

7 of the sweets are red.

8 of the sweets are yellow.

Phil takes at random **two** sweets from the bag.

Work out the probability that the sweets will **not** be the same colour.
